

Tiger Shark

Tiger sharks average around 10-14 ft, but can get to over 20 ft. They are great scavengers, with excellent sight and sense of smell.

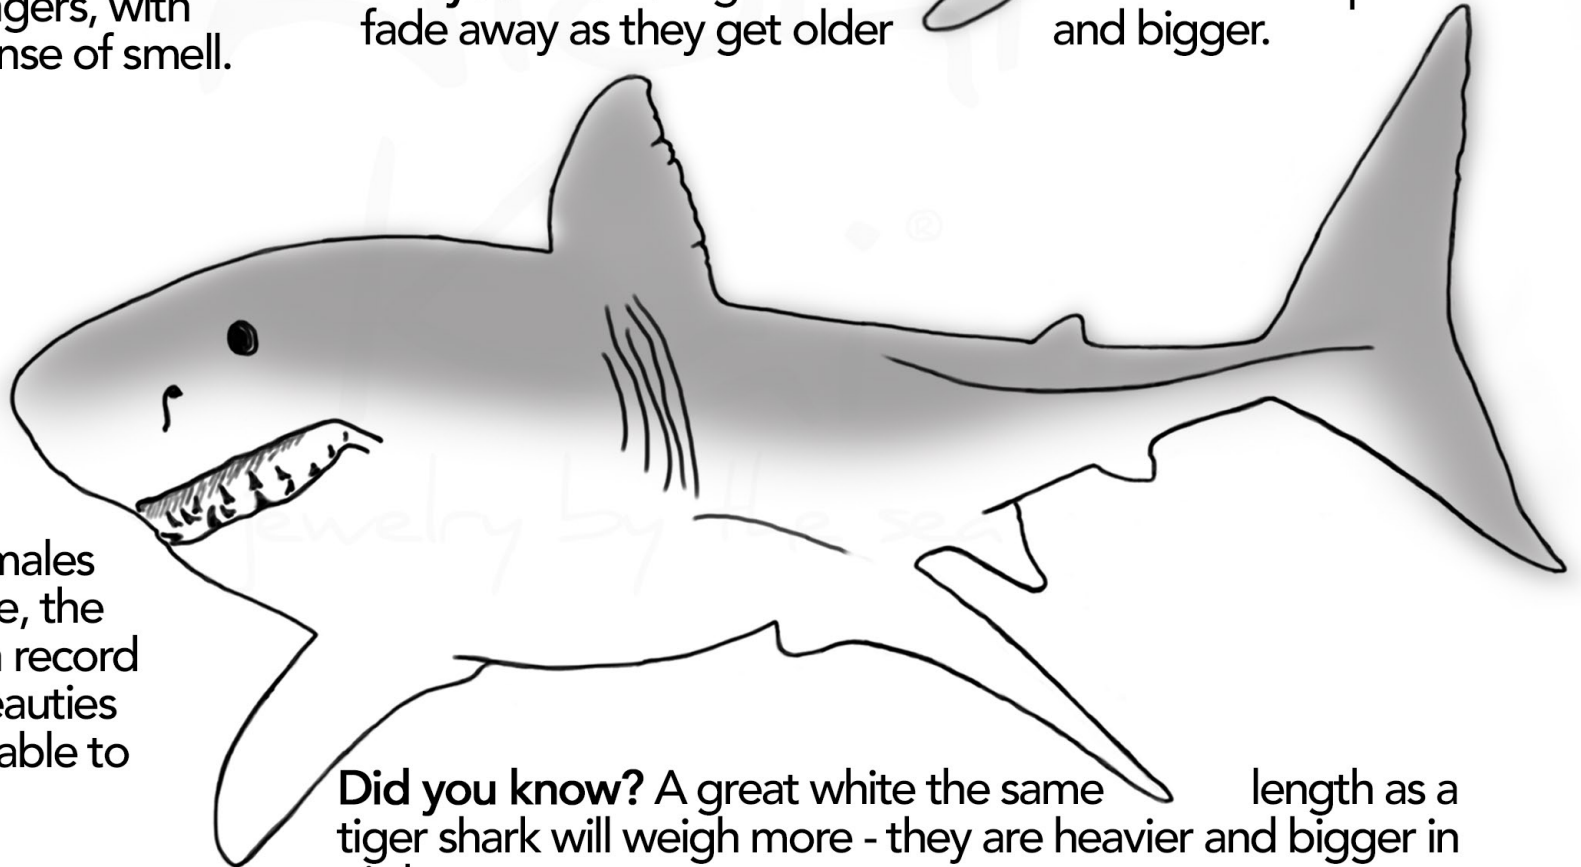

Did you know? Tiger sharks' distinctive 'stripes' fade away as they get older and bigger.

distinctive 'stripes' and bigger.

Great White Shark

Great White females average about 15 ft, males about 12 ft. Deep Blue, the largest great white on record is over 20 ft! These beauties are considered vulnerable to extinction.

Did you know? A great white the same length as a tiger shark will weigh more - they are heavier and bigger in girth.
